

fire dampers OKS-1

Fire damper OKS-1 can be used as a fire and as a smoke damper. Dampers are produced with normally opened shutter fire damper and with normally closed shutter fire damper.

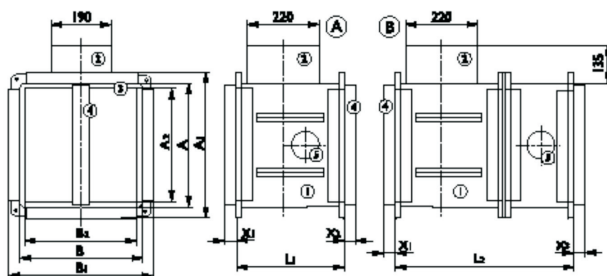

Fire damper OKS-1 is used for preventing the spread of fire and flue gases in ventilation ductwork.

Dampers OKS-1 are produced in two types of casing construction:

- single-section with fire resistance limit 1 hour
- double-section with fire resistance limit 2 hours

Dimensional data

A - single-section casing
B - double-section casing

Type of damper	Sizes, mm
